

## AIRLESS-spray gun S 720/KL Extrusion

The spray gun S 720/KL is an extrusion gun (without atomizing the material). It is designed for bead pattern application of glues and other high viscosity fluids.

The following further advantages of AIRLESS-spray guns of series S 720 were realized:

- robust construction
- ergonomic design for comfortable handling
- long trigger for optimal leverage
- reliable seat unit for durable use under hardest conditions
- mechanics without any problems

#### Safety measures:

- trigger lock
- strigger guard

#### Standard version:

- swivel 1/4"
- tool

#### Technical data:

|                    |                                     |
|--------------------|-------------------------------------|
| weight:            | approx. 700 g                       |
| material pressure: | max. 50 bar                         |
| gun body:          | aluminium, chemically nickel plated |
| nozzle:            | stainless steel                     |
| needle:            | stainless steel                     |
